

ASHVIN MORI

+91 7359687749 ◇ Ahmedabad, Gujarat 380061

moriashvin892001@gmail.com ◇ [LinkedIn](#) ◇ [Portfolio Website](#)

OBJECTIVE

Full-Stack .NET Developer with 3+ years of experience in **ASP.NET Core, Web API, Angular, and Azure**, skilled in SQL optimization, REST APIs, CI/CD pipelines, and **AI-assisted development** for high-quality delivery in Agile environments.

SKILLS

- **Frontend:** JavaScript, HTML5, CSS3, React.js, Angular, Bootstrap
- **Backend & Libraries:** C#, ASP.NET Core, Web API, MVC, Entity Framework Core
- **Databases:** SQL Server, PostgreSQL, T-SQL
- **Cloud & DevOps:** Microsoft Azure (Azure Face API, App Services, Azure Functions, Virtual Machines, Azure API Management, Application Insights, Key Vault, Azure App Configuration), Azure DevOps, Bitbucket, Jira
- **Version Control:** Git
- **Architecture & Practices:** RESTful APIs, JWT Authentication, Agile/Scrum
- **AI & Productivity :** GitHub Copilot, ChatGPT, Google Gemini, Claude AI, DeepSeek, Perplexity AI, Grok AI

EXPERIENCE

Senior .NET Developer

Welspun Transformation Services (Welspun GCC)

Jan 2026 - Present

Ahmedabad, Gujarat

- Developed and managed a **Visitor Management System**, enabling seamless visitor entry and exit using **QR code-based passes** and automated workflows.
- Implemented **Face Recognition and Liveness Detection** using **Azure Face API**, enhancing security and preventing spoofing in visitor authentication.
- Integrated **Aadhaar-based OTP verification** to securely fetch and validate visitor data, ensuring compliance and data protection.
- Designed and managed **SQL Server databases**, handling large-scale data efficiently and ensuring optimized performance.
- Independently handled **end-to-end project development**, delivering features quickly in a **lean and agile environment**.
- Implemented **scheduled jobs** to automate system processes such as visitor logs, notifications, and data cleanup.
- Built user-friendly interfaces to ensure smooth adoption, improving overall **user experience and operational efficiency**.
- Conducted **user training sessions**, helping stakeholders understand system workflows and reduce operational load.
- Focused on **performance optimization**, reducing system latency and improving scalability.
- Followed best practices in **secure data handling**, ensuring sensitive user information is processed safely and efficiently.

- Streamlined **A360 Management Console**, enhancing CRM capabilities for alcohol industry supply chain digitization.
- Used **AI-assisted development tools** (e.g., GitHub Copilot / AI code suggestions) to accelerate feature development, refactoring, and bug fixing.
- Leveraged **AI tools** for **code generation, optimization, test case creation, and documentation**, improving delivery speed and code quality.
- Applied **AI-assisted** debugging and performance analysis to identify bottlenecks in .NET and SQL-based applications.
- Hands-on experience deploying and managing **.NET applications on Azure App Services and Azure Functions**.
- Used **Azure Application Insights** for monitoring, logging, and troubleshooting across environments.
- Managed secure configuration using **Azure Key Vault and Azure App Configuration**.
- Worked on **SQL query optimization (PostgreSQL's)** and handled **large-scale data processing**, improving performance and reducing execution time.
- Developed and maintained features using **.NET Core Web API** and integrated with **Angular** for the company's core product.
- Managed tasks using **JIRA**, source code with **Bitbucket**, and implemented **CI/CD pipelines** for automated builds and deployments.
- Improved **application performance and scalability** through code refactoring, caching, and database tuning.
- Gained hands-on experience with **Git version control**, continuous integration, and deployment best practices to streamline development workflows.

- Developed and maintained full-stack **.NET MVC** applications using **EF Core** and **ADO.NET Core**.
- Developed and maintained features using **.NET Core Web API**.
- Deployed scalable solutions on **Azure App Services**, managed **Blob Storage**, **AI Search**, and VMs.
- Integrated SharePoint with .NET and built Teams chatbots using SPFx and React.js.
- Implemented secure authentication using **JWT** and managed **FTP** deployments via **FileZilla**.
- Collaborated in Agile teams, using Azure DevOps for task management and **Git** for version control.
- Contributed to a **Predictive Analytics Platform**, implementing forecasting models using .NET Core and PostgreSQL to project agricultural returns.
- Engineered backend logic for a **Construction Estimation System** with complex tax and cost calculations and automated PDF reporting.
- Designed and deployed an **AI-powered Chatbot Solution** using Azure **OpenAI**, Cognitive Services, and SharePoint integration for document-based Q&A.

EDUCATION

Bachelor of Computer Application, Saurashtra University
CGPA: 8.0

2019 – 2022
